

Universal Face Plates

Description

Digi-Link offers a range of high quality, state of the art designed Face Plates for professional installations, needed to provide fully compliant copper cabling systems. The Face plates are inbuilt with transparent shutters which compatible any standard coloured keystones jacks thus giving advantage. We recommend that you use the Digi-Link standard jacks available in all standard colours & are high performers that fit well with the face plates. The Silver Plus face plates are with the latest trends & richer looks, which hide the screws thus giving different corporate looks.

Applications

Termination of twisted pair LAN and telephone cables.
