

IPLMS (Intelli-Patch Solutions)

Description

Maintain the quality of your system by monitoring it with the Intelli Patch Plus Solution. This solution is based on sensors that are embedded throughout the structured cabling system, which allow information to be transmitted back and forth between the ports and a centralized database in real-time.

Benefits and Features

- ✓ Maximize your assets by knowing exactly which patch panel and switch ports are in use.
- ✓ Reduce downtime by alerting personnel when any unplanned move, add or change is detected
- ✓ Reduce labor cost and maintain database accuracy by automatically transmitting move, add and change information to the database.
- ✓ Reduce labor costs by guiding technicians to perform error-free moves, adds and changes.
- ✓ Access real-time information and manage remote sites 24/7 through the Internet.
