

Fiber Tools

Description

The tools form an essential ingredient of any kit that is required by service personnel. The structured cabling system lays stress on following the practices which will add elegance, discipline, method and reliability to cabling. The tools which are used in installation of a cabling system go a long way in determining the above few characteristics.

Digi-Link Fiber Tool Kit is designed for termination of fiber cables and cords in the field. It has specifically designed tools and consumables to enable quick and effective termination.
